

SNOW PLOW V-BLADE

The Blue Diamond® Snow Plow V-Blade is a versatile, heavy duty V-style blade that can be used both for snow and for dirt work. The electric-over-hydraulic controls allow this blade to be used in a conventional-style straight blade. The V-back style pushes off to both sides and the V-forward setting scoops material. The trip function has a lockout for use in dirt, and the electrical hookup can be set for use with any skid steer model.

FEATURES INCLUDE

- Best for snow and light dirt applications
- V, scoop, and angle up to 30° left or right
- Trip springs for snow; trip lockout for dirt applications
- Replaceable cutting edge; adjustable skid shoes
- Rolled moldboard for better material flow
- Available for mini-machines
