

AUGER BITS & EXTENSIONS

Maximize the reach and performance of your auger with **Blue Diamond® Auger Bits & Extensions**. Heavy Duty Bits with Cast Head, Rock Bits, and Tree Bits help tackle heavy clay, frozen ground, fracturable rock asphalt, compacted soils, solid rock and concrete, and moderate ground conditions. Extensions are available in lengths from 12" to 72". Designed for durability and versatility, these extensions help you get the most out of your auger bits and drive units in demanding drilling applications.

Choose between fixed and variable-length options:

- Fixed extensions feature a solid shaft for maximum strength and are ideal for high-pressure drive units or strenuous applications.
- Variable extensions include adjustment holes every 12" for flexible drilling depth and multi-position use.

AUGER EXTENTIONS

Fixed

Variable

The standard collar is 2" hex with 2" round and 2 9/16" round being available upon request. Adapters are also available to mount our bits to other drive units.

Extensions are available in 2', 4' and 6' lengths. The variable option has a hole every 12" for use in multiple positions (works on 10" and bigger bits only) and the fixed is a solid shaft. The fixed style is recommended if the application is very strenuous or when using high pressure drive units.

KEY FEATURES

HEAVY DUTY BITS

- ♦ Moderate ground conditions
- ♦ Fabricated boring head
- ♦ Hardened bolt on teeth
- ♦ Hardened fishtail point
- ♦ 4' standard length
- ♦ Heavy duty double flighting

HEAVY DUTY BITS WITH CAST HEAD

- ♦ Difficult ground conditions, heavy clay, frozen ground, fracturable rock, asphalt and compacted soils
- ♦ Cast steel boring head
- ♦ Hardened drive-in teeth
- ♦ Hardened fishtail point
- ♦ 4' standard length
- ♦ Heavy duty double flighting
- ♦ Carbide teeth available

ROCK BITS

- ♦ Solid rock and concrete
- ♦ Cast tooth pockets
- ♦ Drive-in carbide bullet teeth
- ♦ 3/4" thick boring head
- ♦ 4' standard length
- ♦ Will not work for dirt

TREE BITS

- ♦ Tapered version of Heavy Duty bit

EXTENTIONS

- ♦ Available in Hex or Round shafts
- ♦ Fixed or variable length options (12"–72")
- ♦ Single-hole fixed design for full-length use
- ♦ Variable model includes a hole every 12" for adjustable depth
- ♦ Recommended for 9" auger bits and larger
- ♦ Retainer bolt and nut required for installation
