

AUTOWING SNOW PLOW BLADE

The **Blue Diamond® Skid Steer Autowing Snow Plow** combines straight-blade simplicity with the productivity of automatically adjusting mechanical wings. The 103-inch blade transitions from scoop mode to an efficient windrowing configuration as the moldboard is hydraulically angled, helping carry up to 30% more snow in scoop mode and reduce spill-off during windrowing. The wings can also be pinned back when traditional straight-blade operation is preferred.

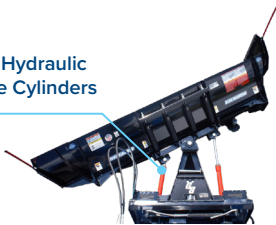

Built for commercial snow removal, the Autowing features a 29-inch full-trip moldboard, up to 25° hydraulic angle, 6° oscillation, spring-loaded impact-responsive wings, and replaceable 6-inch carbon steel cutting edges. A fully welded torque box, reinforced base channel, and structural ribs provide the strength needed for demanding winter conditions, while included hoses, flat-face couplers, and a universal skid steer mount make it ready for professional snow removal.

KEY FEATURES

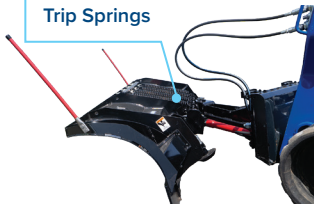

- ◆ 103" overall blade width
- ◆ 93.4" plowing width at full angle
- ◆ 29" moldboard height
- ◆ Automatic mechanical wing adjustment
- ◆ Automatically transitions between scoop and windrow configurations
- ◆ Wings can be pinned back for straight-blade operation
- ◆ Dual 1.5" hydraulic angle cylinders pivot blade up to 25°
- ◆ 6° oscillation follows changing ground contours
- ◆ Full-trip moldboard with four heavy-duty 3/8" steel trip springs
- ◆ Spring-loaded wings give and retract when encountering obstacles
- ◆ Replaceable 6" carbon steel cutting edges on moldboard and wings
- ◆ 12-gauge powder-coated steel blade and wing construction
- ◆ Steel base channel and formed torque box with four welded vertical reinforcement ribs
- ◆ Adjustable plow shoes and side markers
- ◆ Pre-punched blade for accessory installation
- ◆ Hydraulic hoses and 1/2" flat-face couplers included
- ◆ Universal skid steer mount

Dual Hydraulic Angle Cylinders

Fully angled blade

3/8" Steel Trip Springs

Full-trip moldboard

Adjustable plow shoes

Replaceable 6" carbon steel cutting edges

Dual 1.5" hydraulic angle cylinders

PART NUMBER	320720
MODEL	103" AUTOWING KIT WITH SKID STEER MOUNT AND 1/2" FLAT FACE COUPLERS (REQ. ASSEMBLY)
ANGLED WIDTH	93.4"
PIVOT ANGLE	25°
HYDRAULIC CYLINDERS	2 - 1 1/2" CYLINDERS
MOLDBOARD HEIGHT	29"
THICKNESS	12-GAUGE
WEIGHT	1,119 LBS
