

PICKUP BROOM

SERIES 2

Grease Fittings on Pivot Points

Optional 37 Gallon Water Kit

26" Diameter Poly-Steel Bristles

Bolt-On Rubber Skirting

The **Blue Diamond® Series 2 Pickup Broom** is built for heavy commercial and industrial sweeping applications, delivering unmatched durability and performance for skid steers and compact track loaders. Designed through years of field testing and market research, this premium skid steer pickup broom attachment stands up to the toughest conditions — from roadwork and construction cleanup to demanding rental use.

Its simple, reinforced design strengthens high-wear areas and protects critical components from impact damage. The low-profile water tank enhances visibility and operator safety, while the optional pressurized water system helps control dust during sweeping.

The 26" poly/steel broom provides powerful debris collection and is available in 60", 72", 84", and 96" widths. A bolt-on 8" x 3/4" double bevel edge adds strength to the bucket's leading edge, while wear bars on the bottom prevent premature bucket wear. With oversized bearings, spindles, and a heavy 2" main shaft, the Series 2 sets a new standard for durability among competitive pickup brooms.

KEY FEATURES

- ◆ Available in 60", 72", 84", and 96" working widths
- ◆ 26" diameter poly/steel bristles for aggressive sweeping
- ◆ Reinforced 7" front crash bar protects against impact damage
- ◆ Heavy-duty 2" main shaft with oversized 6" bearings
- ◆ Motor and shaft guards for added longevity
- ◆ Heavy-duty dump stops for structural integrity
- ◆ Grease fittings on all pivot points and bearings for easy maintenance
- ◆ Steps mounted on the back of the bucket for safe entry/exit from the host machine
- ◆ 1½" x 7" zinc height adjustment pins with four adjustable positions
- ◆ Bolt-on rubber skirting helps contain debris
- ◆ Optional gutter brush for edge cleaning
- ◆ Predrilled for optional 37-gallon pressurized water system kit (low-profile tank for better visibility)
- ◆ Dimensions: 28"H x 58"D

Covered motor and protected bearing

Optional gutter brush

Pressurized water system
