

EXCAVATOR RAKE HEAVY DUTY

The **Blue Diamond® Heavy Duty Excavator Rake** is engineered for exceptional performance when you need a clean, debris-free finish. Designed for 6,000–15,000 lb excavators, this rake is essential for land clearing, demolition, and material sorting.

With 1/2" thick steel tines, this attachment rips through soil to expose and remove embedded roots while allowing loose dirt to flow through. 6-1/2" tine spacing and gusseted tine tips ensure strength, durability, and efficient material separation. Ideal for removing rocks, light brush, roots, trash, and other unwanted debris. An 18" x 19" bolt-on top plate allows fast mounting changes between machines, adding versatility to your equipment fleet.

18" x 19" Bolt-On Top Plate

1/2" Thick Steel Plate Tines

6 1/2" Tine Spacing

Gusseted Tine Tips

6 1/2" tine spacing for efficient soil & debris flow

18" x 19" mount plate

1/2" thick steel plates tines for added durability

KEY FEATURES

- ◆ Available Sizes: 36", 48", and 60" widths
- ◆ Excavator Compatibility: Models available for 6K–10K and 10K–15K machines
- ◆ 1/2" thick steel plate tines for superior durability
- ◆ 6-1/2" tine spacing allows efficient soil flow and debris separation
- ◆ Gusseted tine tips for enhanced strength in tough working conditions
- ◆ 18" x 19" bolt-on top plate for easy mount interchangeability
