

# LOG GRAPPLE ROTATING

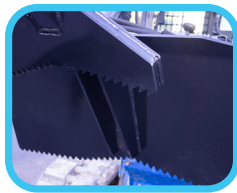

The **Blue Diamond® Rotating Log Grapple** is a high-quality attachment built for demanding tree work, log yard operations, and land clearing applications. Designed for strength and control, this grapple delivers impressive clamping force to securely handle large logs while maintaining stability during transport.

A serrated brace and quick attach help stabilize loads, while the heavy-duty welded cylinder provides reliable performance in tough working conditions. Available in manual rotation or hydraulic rotation models, this attachment gives operators the flexibility to match their machine and workflow.

With a 2,500 lb capacity and a wide opening range, the Blue Diamond Rotating Log Grapple is built to handle serious wood-handling jobs with confidence.

Serrated clamps to hold onto large logs

Serrated quick attach for load stabilization

Hose shield to protect hoses against flying debris

## KEY FEATURES

- ◆ 2,500 lb lift capacity
- ◆ Available in manual or hydraulic rotation models
- ◆ Opens to 63" and closes to 4"
- ◆ Serrated quick attach for improved load stabilization
- ◆ Serrated boom for stabilizing and pushing logs
- ◆ Heavy-duty welded hydraulic cylinder
- ◆ Strong clamping force for secure log handling
- ◆ Rope tie / chain tie-off attachment point
