

ROTATING LOG GRAPPLE

The Blue Diamond Rotating® Log Grapple is a high quality attachment for tree work. Whether you are working in the log yard or clearing land, this tool can handle the load. The serrated brace helps stabilize logs when moving. The impressive clamping force holds onto large logs very tightly. Two models are offered: manual rotation and hydraulic rotation.

FEATURES INCLUDE

- 2,500 lb capacity
- Serrated quick attach for load stabilization
- HD welded cylinder
- Serrated boom to stabilize and push
- Rope tie / chain tie off attach point
- Closes up to 5 inches
- Opens to 62 inches
