

LOG SPLITTER 25-TON EXCAVATOR

The **Blue Diamond® Heavy Duty Excavator Log Splitter** delivers 25 tons of hydraulic splitting force for excavators weighing 8,000 to 20,000 pounds. Designed to process logs up to 22 inches long, it features a heavy-duty 4-inch bore × 24-inch stroke hydraulic cylinder, durable 2-inch chrome-plated cylinder rod, reinforced slider assemblies, oversized greaseable pivot pins, and protected hose routing for long-lasting commercial performance.

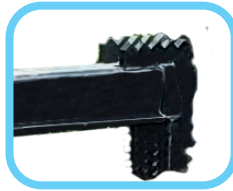

Its innovative inverted design allows operators to perform the entire splitting process from inside the excavator cab. The attachment can be mounted parallel or perpendicular to the operator for preferred visibility and includes an 18" × 19" bolt-on mount plate that allows the splitter to be transferred between compatible excavators. Available with either a 2-way straight wedge or 4-way production wedge, the Blue Diamond Heavy Duty Excavator Log Splitter is ideal for commercial firewood producers, tree service companies, municipalities, forestry contractors, and rental fleets.

Protected hydraulic hose routing

Welded steel construction

Steel teeth to grip logs

KEY FEATURES

- ◆ 25 tons of hydraulic splitting force
- ◆ Fits logs up to 22 inches long
- ◆ Rated for 8,000–20,000 lb. excavators
- ◆ Heavy-duty 4-inch bore × 24-inch stroke hydraulic cylinder
- ◆ Durable 2-inch chrome-plated cylinder rod
- ◆ Innovative inverted design for in-cab operation
- ◆ Operates parallel or perpendicular to the operator for preferred visibility
- ◆ 2-way straight wedge or 4-way production wedge options
- ◆ Welded steel construction and heavy-duty reinforced slider assemblies
- ◆ Oversized greaseable pivot pins
- ◆ Protected hydraulic hose routing
- ◆ Hydraulic hoses and flat-face couplers included
- ◆ Universal 18" × 19" bolt-on mount plate allows use on multiple excavators
- ◆ One-year warranty
