

# NURSERY FORK MINI

49" Curved Backrest

Greaseable Pivot Points

Opens to 43"

Heavy-Duty Hydraulic Cylinder

The **Blue Diamond® Mini Nursery Forks** is specifically designed for mini skid steers and compact track loaders, providing a safe and efficient solution for transporting trees, shrubs, root balls, and other landscaping materials. Its compact design allows operators to work in confined areas while maintaining the lifting power and control needed for demanding nursery and landscaping applications.

Featuring a 2,000-pound lifting capacity, a narrow 36-inch overall width, and 43-inch forks, the Mini Nursery Fork delivers exceptional maneuverability without sacrificing performance. The curved backrest helps secure trees and plant materials during transport, reducing load movement and improving stability across uneven terrain.

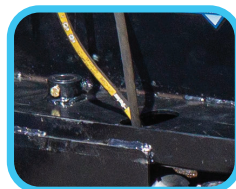

The versatile tine design also allows the attachment to serve as pallet forks in select applications, maximizing productivity and value on the jobsite. Built with a heavy-duty hydraulic cylinder and greaseable pivot points, the Mini Nursery Fork is engineered for long-lasting durability and reliable operation season after season.

## KEY FEATURES

- ◆ 45" fork length
- ◆ 2,000 lb lift capacity
- ◆ 43" maximum opening width
- ◆ 3" minimum closing width
- ◆ Compact 36" overall width
- ◆ Heavy-duty hydraulic cylinder
- ◆ Grease fittings on all pivot points
- ◆ 49" curved backrest
- ◆ Complete with hydraulic hoses and flat-face couplers
- ◆ Mini Universal and Bobcat MT mounts available
