

NURSERY FORK

STANDARD DUTY

The **Blue Diamond® Standard Duty Nursery Forks** is designed to safely and efficiently transport trees, shrubs, and other landscaping materials with your skid steer. Featuring a wide 60-inch opening and a 2,500-pound lifting capacity, this attachment provides the versatility and control needed for nursery, landscaping, and material handling applications.

Its curved backrest helps stabilize trees during transport, reducing movement and improving operator confidence. The tine design also allows the attachment to function as pallet forks in select applications, increasing versatility on the jobsite.

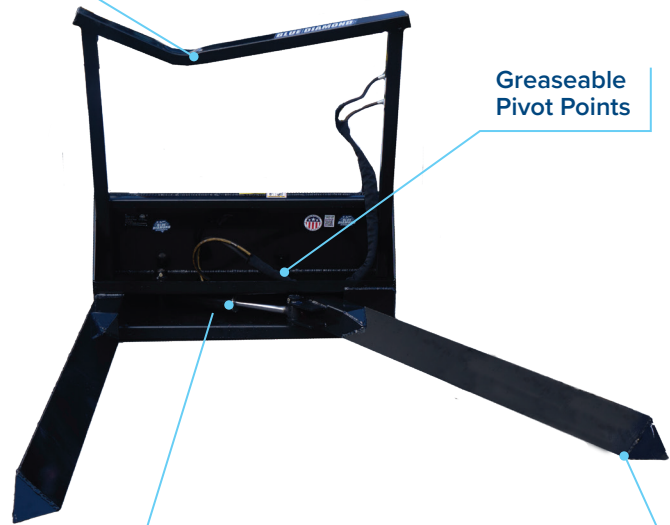

Built for durability, the Standard Duty Nursery Fork features greaseable pivot points and a heavy-duty hydraulic cylinder to ensure long service life and dependable performance in demanding environments.
