

# ROOT RAKE

## SEVERE DUTY

The **Blue Diamond® Severe Duty Root Rake** is engineered for intense land clearing and site preparation using your skid steer or track loader. Built from heavy-duty 5/8" solid steel tines, this rake delivers the strength needed to move large rocks, uproot stubborn roots, and gather debris into manageable piles. The 5-1/4" tine spacing allows dirt to pass through while capturing sticks, rocks, roots, and other unwanted materials—perfect for cleanup, brush management, and burn-pile preparation.

The rake's 33" height, reinforced frame tubing, and precision-engineered tine layout ensure excellent load control, allowing operators to roll debris easily and maintain stability while working. With its universal skid steer mount and rugged U.S.-made construction, this attachment provides long-lasting performance for contractors, landowners, and forestry professionals.

### KEY FEATURES

- ◆ Available Widths: 60", 72", 78", 84"
- ◆ 5/8" thick solid steel tines for extreme durability
- ◆ 5-1/4" tine spacing allows efficient dirt sifting and debris separation
- ◆ 33" overall height for increased material control
- ◆ Reinforced frame tubing enhances structural strength under heavy loads
- ◆ Universal skid steer mount included for easy hookup
- ◆ Made in the USA

5 1/4" tine spacing for efficient soil & debris flow

Reinforced frame tubing for enhanced strength

5/8" thick steel tines for extreme durability
