

TREE GRUBBER EXCAVATOR

The **Blue Diamond® Excavator Tree Grubber** is designed to remove unwanted trees, shrubs, and invasive brush at the root. Its blunt V-shaped grubbing plate, AR400 cutting edge, and serrated side plates dig beneath the surface to grab and pull taproots, helping prevent regrowth.

Built for excavators from 6,000 to 40,000 lbs, the Tree Grubber features heavy-duty 3/4" or 1" steel construction, excellent operator visibility, and predrilled mounting locations for optional side cutters.

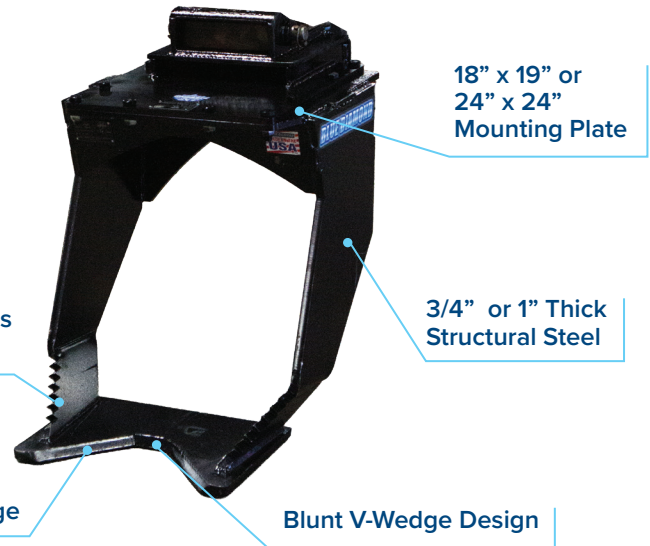

AR400 cutting edge

Built from 3/4" or 1" thick structural steel

5" serrated edges on side plates

KEY FEATURES

- ◆ Removes Taproots — Helps prevent unwanted trees and brush from growing back.
- ◆ Blunt V-Wedge Design — Grabs and lifts roots instead of cutting through them.
- ◆ AR400 Cutting Edge — Built for durability in tough ground conditions.
- ◆ 5" Serrated Edges on Side Plates — Adds aggressive gripping and digging action.
- ◆ Excellent Visibility — Open-frame design makes it easy to position at the base of the tree.
- ◆ Heavy-Duty Construction — Built from 3/4" or 1" thick structural steel.
- ◆ Side Cutter Ready — Predrilled for optional side cutters.
- ◆ Two Excavator Sizes — Fits carriers from 6,000 to 40,000 lbs.
