

# TREE PULLER HEAVY DUTY

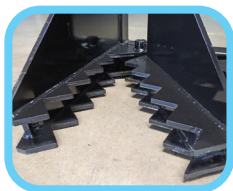

The **Blue Diamond® Heavy Duty Tree Puller** is the ideal attachment for removing small trees, shrubs, and fence posts when complete root extraction is required. Its powerful gripping jaws feature a double row of serrated teeth that firmly clamp onto the base of trees or posts for maximum holding strength. Designed for skid steers, the Tree Puller provides the leverage needed to pull vegetation and posts directly from the ground, removing roots and leaving the surrounding soil minimally disturbed. Built for durability and performance, it is an efficient solution for land clearing, fence line maintenance, and property management.
