

# DRUM MULCHER

The Blue Diamond® Drum Mulcher is designed for clearing brush and heavy mulching. With a 60" cutting width and 34-tooth cutting drum, our mulcher knows no equal. From clearing acres of dense trees to site preparation, no job is too big or too small for your skid steer and the Blue Diamond® Drum Mulcher. Our mulcher uses cutting drum bearings and an overhung load adapter. The head can be configured to be installed on either a closed-loop or open-loop hydraulic system, providing versatility based on the machine you operate and the unique mulcher body design. This also allows for debris to be shed in minimal accumulations.

PART NUMBER	MODEL	BEST FLOW	WEIGHT
190110	<b>60" W/Chipping Teeth</b>	35-52 GPM	2,460 lbs
390115	<b>60" W/Carbide Teeth</b>	35-52 GPM	2,504 lbs
